Call Stack

Debug I/O	Stack Data	Debug Probe	Watch	Exceptions	Breakpoints	Python Shell	OS Commands
-----------	------------	-------------	-------	------------	-------------	--------------	-------------

Debug I/O (stdin, stdout, stderr) appears below

Expanding nodes...

Nodes on the open_list:

```
node.state = 8, path_cost = 12
```

```
node.state = 3, path_cost = 13
```

```
node.state = 1, path_cost = 15
```

```
node.state = 8, path_cost = 16
```

Popped node 8 with path_cost of 12

```
Found solution!
```

Path from 2 to 8

Total cost of 12

```
The path from start to finish is: ['2', '13', '5', '8']
```
